

Word choices

Don't just force them in because you feel you have to. But when you see an opportunity to use one, build it into your line or phrase. You'll be contributing to a culture every time.

You'll see that corporate clichés like “raise the bar”, ‘dial up” and “head for new heights” aren’t on the list. It’s because they’re used so often, they don’t mean much now. Leave them out.

Instead, if you can think of some new ones, feel free. Remember we’re a company of thinkers.
